

<b>Storefast Solutions Environmental Policy</b>	Document ref	QMS_20
	Page	1 of 2
	Revision no	3
	Date Issued	05/09/2023
	Issued by	E. Smith-Mensah

Storefast Solutions Ltd is a supply, storage, handling, packing, re-bulking and blending service to the food and pharmaceutical industries.

At Storefast, we firmly believe that protecting the environment is a vital means for the success of the business and we embed this belief through our management and employees.

With this engagement we ensure that we all have ownership to maintain the continuous improvement of our environmental performance and minimise our impact on the environment in general. Our operations will be managed in a way which ensures the efficient use of natural and renewable resources and the promotion of sustainable development. We will comply with all applicable regulatory and legislative requirements, efforts to prevent pollution and to improve the environmental performance, throughout all our activities as an integral part of our daily business.

As our daily business implements this commitment through a program of continual environmental improvements. We ensure that we will:

- Comply with legal requirements and permits.
- Reduce the use of energy, water and chemicals per unit of production.
- Limit the nuisances (odour, noise and emissions).
- Reduce the disposal of liquid and solid wastes.

These improvements will be achieved by:

1. Controlling our current operation through appropriate operating procedures. We are committed to contribute towards the development and introduction of environmentally friendly production methods and products.
2. Evaluating the environmental impact of new projects; re-developments and/or important process modifications. We will maintain a pro-active, constructive relationship with regulatory authorities, relevant local bodies, and our neighbours.
3. Developing contingency plans and procedures for incidents, emergencies and disaster relief.

This environmental policy is communicated to all employees and is integrated into all company operating procedures.

Date:
